**Restriction / Election**

Examiner acknowledges submission of Terminal Disclaimer by the Applicant in response to Office Action dated 7/30/02. Below is a written restriction / election requirement.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a pesticide comprising 1) a non-aqueous, water miscible solvent and 2) two or more alkaloids, classified in class 424, subclass 405.
- II. Claims 31-48, drawn to a method of applying to an object a pesticide composition comprising 1) a non-aqueous, water-miscible solvent plus 2) two or more alkaloids, classified in class 424, subclass 405.
- III. Claim 49, drawn to a method of applying to an object a pesticide composition comprising 1) a non-aqueous, water-miscible solvent and 2) an extract of two or more plants, classified in class 424, subclass 405.
- IV. Claims 50-56, drawn to a process for manufacturing a pesticidal composition comprising extracting in an organic solvent two or more plants, classified in class 424, subclass 405.

Inventions I and II and III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together.

Art Unit:

Because these inventions are distinct for the reasons given above and the search required for one invention is not required for the other invention.

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous pesticidal compositions / methods.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, an invention comprising a non-aqueous organic solvent plus alkaloids or plant extracts is generic.

Applicant is advised that a reply to this requirement must include an identification of the species **(elect a specific non-aqueous organic solvent and at least two specific alkaloids or for invention IV elect specific plants along with specific organic solvent)** that is elected consonant with this requirement, **and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CAR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit:

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
